US equities have compounded much faster than India equities

Value of Rs. 1Cr invested 15 years ago (in INR)
across different markets#

US equities outperformed India equities in 10 out of the last 15 years

Annual Price Returns (INR)					
Date	World	US S&P	US Nasdaq	India	Alpha (Nasdaq vs India)
2012	21%	17%	21%	32%	↓ -11%
2013	38%	46%	52%	4%	↑ 49%
2014	7%	14%	21%	38%	↓ -17%
2015	3%	4%	14%	-1%	↑ 14%
2016	11%	12%	8%	4%	↑ 4%
2017	17%	13%	24%	36%	↓ -12%
2018	-1%	2%	8%	-3%	↑ 11%
2019	29%	31%	41%	8%	↑ 33%
2020	19%	19%	51%	17%	↑ 35%
2021	21%	29%	29%	30%	↓ -1%
2022	-9%	-10%	-25%	3%	↓ -28%
2023	21%	23%	53%	26%	↑ 27%
2024	22%	29%	30%	15%	↑ 15%
2025	27%	22%	26%	7%	↑ 19%
YTD	18%	17%	28%	-4%	↑ 32%
CAGR	16%	18%	25%	14%	
1Cr invested 15-years ago	9Cr	11Cr	24Cr	6Cr	

Constant rupee depreciation enhances returns of a dollar portfolio

Why INR Continues to depreciate against USD?

	Starting Value	Growth	Ending Value
USD Value of Portfolio	\$100	15%	\$115
USD/INR Exchange rate	90	5%	95
INR Value of Portfolio	₹9,000	21.4%	₹10,925

And dollar investing is a great hedge against India portfolio

Historical correlation between India and US Equities

Nifty 500 (India) and S&P 500 (US), ex-Covid

When NIFTY500 declines over the course of a month, there is a **more than 50%** chance that the US portfolio would actually rise over the month, with the average monthly rise during such months being **3%** in INR terms

Episode	Time Period	Nifty 500	S&P 500	Difference
Where Diversification works <u>BEST</u> : India-centric issues				
FII Selling	Sept'24 to Feb'25	-19%	+8%	+27%
IL&FS Crisis	Aug'18 to Oct'18	-16%	-6%	+10%
Demonetization	Sept'16 to Dec'16	-12%	+6%	+18%
India BoP Crisis	Jan'13 to Aug'13	-17%	+36%	+53%
Where Diversification is <u>NOT</u> as powerful : Global issues				
Covid 19	Jan'20 to Mar'20	-38%	-28%	+10%

So, why do US markets give better returns over long term?

FIVE STRUCTURAL ADVANTAGES BEHIND SUPERIOR RETURNS ON CAPITAL

IP heavy businesses

Software (e.g. Google), brands (e.g. Hermes) or patents (e.g. Eli Lilly) — earn high returns on capital and generate large free cash flow. The unit of growth for these companies is innovation, with near-zero marginal cost for incremental revenue

MEDIAN ROIC

~25%+ ROIC for Big Tech¹ companies in US

Global, winner-takes-most models

The biggest US franchises earn worldwide but list at home — this hands the leader a global profit pool. Foreign companies also go list in US to get appropriate investor interest and attention

REVENUE EX-U.S.

~40% of sales outside US²

The world's deepest capital markets

The largest equity, debt and venture pools in the world let strong US businesses raise capital cheaply and scale faster than peers elsewhere can. The robust governance structure leads to lower risk premium and in turn, premium valuations as compared to listing in other markets

U.S. SHARE

~65% of global mkt cap³

An innovation and talent flywheel

Concentrated R&D, the top universities and the world's best tech talent keep the category winners — AI, cloud, semiconductors — being built and listed in the US

R&D SPEND

~15% of sales in R&D or new product by Big Tech¹

Shareholder-first capital allocation

Management is judged on per-share value: disciplined buybacks, clear capital-return policies and strong disclosure recycle capital to its highest-return use

SHAREHOLDER YIELD

3.5% Combined Dividend & Buyback yield⁴

Mag 7's 20%+ profit growth is a classic example of this IP led growth

Gross Margins	70%	70%	47%	60%	50%	82%	20%
Annual Profit	120	102	112	132	78	60	9
10 Yr Profit Growth%	58%	20%	12%	21%	20%^	25%	42%^
Market Cap (\$Tn)	4.8	3.0	4.6	4.1	2.3	1.8	1.0
P/E Multiple	30x	23x	38x	28x	29x	22x	120x
10Yr Stock Return	70%+	29%+	25%	23%	25%	23%	36%

A Mix of direct equities and ETF is used in order to arrive a optimal allocation from time to time

The chart represents broadly current allocation; Actual allocation could vary significantly from time to time depending on market conditions

Alphabet Inc | Google LLC

One company to rule them all

- Google viz. Alphabet, the world’s second largest company, is the flagbearer of the global tech revolution. It has a wide spectrum of products/services that work as a unified system
 - ✓ Search ↔ Maps ↔ Gmail ↔ Drive ↔ Android
- It competes with all the leading companies of the world at their own turfs and is an innovator par excellence:
 - ✓ 1K+ AI patents in 2025 (1 of only 2 companies)
 - ✓ Search: >90% market share | YouTube: 125mn paid subs
 - ✓ Waymo: 500,000 weekly paid rides (10X in under 2years)
 - ✓ Mobile Ecosystem: 68% of global mobile OS market
 - ✓ Cloud: 14% of global cloud market (↑ 80% YoY in 2Q26)
- Growth drivers :
 - AI payoff : Massive capex laying the foundation for sustained growth - cloud revenues/backlogs surging, while Gemini is being layered into search without cannibalizing the core ad franchise
 - Multiple monetization levers on offer: Youtube, Maps, Android
 - Optionality : Bets like Waymo, TPUs etc. are shifting from R&D drag to embedded call options on AV and adjacent markets
 - Quintessential GARP : 20%+ revenue/earnings growth at 25x PE

Metric (USD, bn)	FY2023	FY2024	FY2025	FY2026E	FY2027E	FY2028E
Revenue	307	350	403	488	585	693

Annual Return, %		32%	64%	14%		
P/E	19.2x	20.1x	29.5x	26.2x		

ASML Holding NV

Monopoly in machines that make advanced semiconductors

- Founded in 1984 as a joint venture between Philips and ASMI, ASML manufactures lithography machines that foundries – TSMC, Samsung, Intel, SK Hynix etc. – use to make chips
- ASML has a monopoly in Extreme Ultraviolet (EUV) lithography : the technology used in producing the most advanced chips for high-end computing. An EUV machine is the epitome of engineering:
 - Contains ~100,000 parts, sourced from 5,000+ suppliers
 - 40 freight containers, 3 cargoes, 20 trucks: to ship 1 machine
 - Yet, prints features to 8nm – a human hair is c.70,000nm thick
 - 20+ years and \$bn in R&D spent to arrive at today’s EUV machines – the tacit knowhow makes its moat near impenetrable
- Growth drivers :
 - AI Infrastructure Surge: Massive capital expenditure from hyperscalers/neoclouds is fueling a super-cycle in advanced Logic and Memory chips, and, consequently lithography machines
 - It plans to increase capacity by 30% annually to meet demand
 - Rising share of margin-accretive installed base machine segment
 - Margin Expansion: Strong demand is leading to a structural improvement in margins driven by higher ASPs, better product mix, and operating leverage

Metric (EUR, bn)	FY2023	FY2024	FY2025	FY2026E	FY2027E	FY2028E
Revenue	28	28	33	44	56	70

Hermès International SCA

The *most* desired brand on planet Earth

HQ : France

Listed : France

- Founded in 1837, Hermès has evolved from a crafts business into the crème-de-la-crème of luxury brands – known for its iconic Birkin and Kelly bags, silk scarves, and saddlery. It has a network of c.300 stores in 45 countries alongside 63 production and training sites
- The family-led business operates on a deliberate supply-constrained model that has led to persistent *waitlists* rather than discount racks
 - ✓ **Pre-spend requirements** for the famed Birkin/Kelly
 - ✓ **Wait time** of 1-3yrs for new clients for Birkin/Kelly
 - ✓ **Quota limit** (theoretical) of two bags per year
 - ✓ **Re-sale premium** in the secondary market
- One-of-a-kind business : A luxury company with the resilience of a staple and solid governance structure leveraging *aspirationalism*. The result is a near impenetrable moat derived on craftsmanship, proprietary processes and artisanal scarcity, yielding pricing power
- Growth drivers :
 - Luxury inflection : Hermès has weathered the luxury downturn and is positioned to accelerate as industry headwinds subside
 - Creep-up in net margins as raw material costs normalize and exception surtaxes are out of the way
 - Discounted valuation : Currently trading at 1S.D. below past 15-year average TTM PE => 25% re-rating potential to mean

Metric (EUR, bn)	FY2023	FY2024	FY2025	FY2026E	FY2027E	FY2028E

CrowdStrike Holdings Inc

Cybersecurity platform powering modern enterprise defence

- Founded in 2011, CrowdStrike is a cloud-first cybersecurity company specializing in security verticals such as endpoint, cloud workload, identity, and security operations. It has c.23% market share¹ globally in modern endpoint security
- Falcon – the flagship product – provides enterprises with a unified view to detect and respond to security threats across their IT stack
 - Widely perceived as the most **AI-native** security platform globally
 - Launch partner of **Claude Mythos Preview**: 1 of 2 cyber companies
- Diversified customer base: 88K organizations (including from MSSPs)
 - 60 out of the Fortune 100 | 50%+ out of the Fortune 500
 - Major: NVIDIA | Intel | Oracle | JPMC | BofA | AmEx | Ericsson
- Growth drivers :
 - Industry tailwind : TAM \$149b now → \$325b in CY30 – structural theme becoming more poignant with the advent of agentic AI, paving the way for 20%+ revenue growth for years to come
 - Consolidation → Oligopoly: “Vendor fatigue” driving CISOs towards platformization – currently pursued only by CRWD and PANW – establishing a telemetry loop that in turn leads to an organic expansion in *average contract value* and wider margins
 - Cash cow (30% FCF³ margin) that allowed it to supplement its equity dilution profile into a formal share buyback program

Metric (USD, bn)	FY2024	FY2025	FY2026	FY2027E	FY2028E	FY2029E

About Ironclad Asset Management : Regulated multi asset firm

THREE REGULATED PRODUCTS — INDIAN EQUITY, PRIVATE STARTUPS, AND GLOBAL MARKETS

 **SEBI-registered PMS** — **Listed Equities**

FOR

Investors seeking long-term Indian listed equity compounding

INVESTS IN

- 18-22 select listed Indian equities with business owner mindset
- Large, mid & small caps across compounders and special situations
- Sectors : Financials (Banks / NBFCs, AMCs, Insurance, etc), Brands (Consumer, Healthcare), Tech / New age & Niche Manufacturing

INDICATIVE INVESTMENTS

- Indicative Investments : ICICI Pru AMC, Home First, Prudent Corporate, Abbott India, Bluestone
- Past Success : 50%+ IRRs in AB Capital, Ather EV, Honasa Consumer in last 18 months

 **SEBI-registered Cat I AIF** — **Venture Fund**

FOR

Exposure to India's venture funded startups & technology companies

INVESTS IN

- Startups already funded by larger VCs
- Entry route : Employee ESOP secondaries, angel secondaries & select primary co-investments
- Typically, Series A entry with allocation towards Seed and Series B
- Sectors : Fintech, Consumer tech, D2C, AI/SaaS, Deeptech & Defence

INDICATIVE INVESTMENTS

- Undisclosed : AI personal finance advisory for High Income consumers; Peak XV backed
- Undisclosed : Retail bonds investment platform with Rs. 3000Cr+ retail bond sold; Venture Highway backed

 **GIFT City IFSCA Regulated** — **Global Markets**

FOR

Investors looking to diversify globally into worlds leading companies

INVESTS IN

- \$-based investments in global markets, with a focus on equities and technology stocks
- Allocation across US (60%+), EU, Japan, China etc.
- Key sectors/themes : Big Tech, Semi/Semicap, Cybersecurity, Biotech, Defence, Luxury, Rare Earth/Energy Security
- Earnings growth and rupee depreciation

INDICATIVE INVESTMENTS

- US Tech : Amazon, Google, CrowdStrike
- Non-US tech : ASML, Tencent
- Non tech : Hermes, Eli Lilly, John Deere

Ironclad Flexicap (India PMS) outperforms NSE 500 in a difficult market environment

Ironclad Flexicap+ PMS Performance

- Outperformed through a turbulent ~18-month cycle** : Ironclad PMS has delivered ~8% outperformance through one of India's most challenging stretches, including US tariff shocks, the Iran-Israel conflict, INR depreciation, record FII outflows, and a broad mid/small-cap correction. Implied total return is ~24% for PMS and 12% for Nifty 500 in this same period.
- ~3-5% sustainable alpha: our long-term post-fee target** : We deliberately target a consistent ~3-5% annual outperformance over the benchmark on a post-fee basis — achievable through quality stock-picking without excessive risk, and one that compounds significantly for long-term investors across a full market cycle.

^ The Nifty 500 serves as our primary benchmark (in line with SEBI approved benchmarks).
PMS inception date is 29th Jan 2025 . PMS returns and benchmark returns are calculated from 29th Jan 2025 onwards on an absolute basis. The implied yearly return for this period is 16.6% for our PMS and 7.06% return for Nifty 500 since inception.

Working with leading financial service providers to ensure safety

- IFSCA registered Investment Advisory
- Registration No : Applied for

- \$150Billico Market Cap | \$789b client assets
- US SEC & US FINRA Registered | GIFT IFSCA Registered
- All transactions happen through Interactive Brokers
- Pioneering computerized trading for c.50 years
- Global market access (170+ markets in 40 countries)

- Transaction services from ICICI Bank, India's top Private Bank

Periodic reporting to ensure full transparency

Monthly Performance statement

Holding reports at monthly intervals

Audited Statements at year end

Investment Advisory (IA) structure is safe and highly IFSCA regulated

Key Information

When an investor invests via IA :

- IA does not actually hold investments in its own name
- Investor's accounts are opened - investments are held in their name
- IA just advises/executes trades in that account on behalf of investors
- IBKR has the actual shares with them

Structure

- Adviser – **Ironclad Latius Global Investments Private Limited** - GIFT City branch
- Regulator – International Financial Services Centres Authority (IFSCA) formed under Act of Parliament viz. International Financial Services Centres Authority Act, 2019
- Indian Residents can remit up to USD 2,50,000 per year per person under the Liberalised Remittance Scheme (LRS) of RBI
- Tax Collected at Source (TCS) by the remitting bank for LRS is 20% of the remitted amount in excess of INR 10L per year
- Taxation rules for foreign securities:
 - STCG (holding period $\leq$ 24months): Slab rates
 - LTCG (holding period $>$ 24months): 12.5%
 - Dividends tax: Slab rates
 - Foreign jurisdictions may withhold taxes. Credit of such taxes depends on the tax treaties India may have with such countries and tax credit rules in India. Please consult your tax advisor for assessing the tax implications applicable to you

Fee Structure is a simple structure

Investment Amount	\$50,000 and above (Around Rs. 50 Lacs) <i>Investments can be started from Rs. 25Lacs and scaled up to over 12 months</i>
Mode of Investment	LRS Transfer for Investment via Gift City <i>All Investments are held in investors' name with investment management rights with Ironclad Latius</i>
Time Frame	3-5 Yrs is Ideal However, there are no lock-ins, so investment can be withdrawn anytime
Fees	Flat fee model like mutual funds: 2% of Market Value of Global Portfolio Managed

APPENDIX

Compounding @ 18-20% can grow capital 50-200 times over long horizons

Compounding can create generational wealth

₹1Cr	15%	20%	25%	% CAGR
10	4Cr	6Cr	9Cr	
21	19Cr	46Cr	108Cr	
30	66Cr	237Cr	808Cr	
Years Invested				

This implies that Rs. 1 Cr invested for :

- 20 yrs, if grown at 20% per year, becomes ~Rs. 40Cr
- 30 yrs, if grown at 20% per year, becomes ~Rs. 240Cr

Investing allows for this compounding as generally investments are **across cycles in a variety of Industries**, thereby hedging long term risks

This is a calculation of what compounding can do and NOT a guidance of expected outcome from investment with us

Diversification across markets is more effective than diversification across stocks
